Statement of the Physicians Union in Syria

We address YOU: Free people in the world over! Raise your voice loud in all countries of the world calling for the halt of this brutal aggression against Syria which is being prepared by The USA and its allies, the old colonizers, the Ottoman Turkey and other Arab governments that have sold their souls to the devil and gave up their commitment to the Arab nation and their origins.

Free people of the Arab world from the Ocean to the Gulf! Your enemy, the American colonizers, want to destroy your countries, one country after another, and divide your nations and dismember their bodies in the framework of the so-called the New Middle East Projects; and draw a new chart in line with the Sixes-Picot map of conspiracy..

For this, the colonizers started to spread chaos and disorder and the hard labour of destruction, bloodshed and sectarian, racist, religious and tribal schemes. All this aims to cancel once and for all the concept of homeland and citizenship, as well as to form scattered cantons.

Let's ask you and ask ourselves, and ask all free peoples in the world; Why this aggression is being concocted against Syria?!

Is it as the US Secretary of State pretends to punish the Syrian Arab Army for an action that they have not perpetrated? There is no slightest evidence about the perpetration by this national army of such an act... Or is it a limited strike as they claim for the restoration of the prestige and dignity of the President of the United States before the world... No it's not! It's a real aggression planned for many years, since 2001 and exactly since the very outset of the invasion of Iraq when the pretext started in the same form (the possession of weapons of mass destruction (WMD's)). So, the Yankees invaded Iraq under the same pretext (of chemical weapons).

They want to invade Syria and under similar pretexts they want to invade other Arab countries, as well as other free nations in the world over.

The claim by US Secretary of State that the Syrian Arab Army have used the chemical weapon is null. He has based his claims on the stories published in the social communication media and Internet and on fabricated photos the basic purpose of which is degrading peoples' brains. These claims are also desperate attempts to convince the peoples

of the world with the necessity of carrying out this brutal aggression against Syria.

We refute the claims of John Kerry by the following facts:

- 1- Is it reasonable that the Syrian Arab Army resort to using chemical weapons while the UN inspectors are only some kilo meters away from the alleged place in which such weapons are used.
- 2- Syria is the Party that invited the UN inspectors to visit the country and to investigate the use of chemical weapons.
- 3- The UN mission have visited hospitals and met Syrian soldiers injured as a result of the chemical weapon.
- 4- Syria is the first country that proposed at the Security Council a draft resolution to rid the Middle East of all kinds of weapons of mass destruction (WMD's) , but the United States is the Party that rejected issuing this resolution.
- 5- Syrian has so far defied the UN mission to show any evidence that the Syrian Arab Army have used chemical weapons.

According to the facts above mentioned, we confirm that the main aim of this slanderous campaign is to launch an aggression against Syrian under any fabricated pretext. This also , for sure, shows the world nations and peoples that Syria and honorable Syrian people will never subdue and will under any circumstance be brought to their knees before the American policy of hegemony.

Syria's choice, government and people, is to stand tall and steadfast in defence of the dignity and integrity of the homeland because the cost of such steadfastness and this defiance and defence is much less than the cost of surrender and capitulation . Surrender and capitulation to the American hegemonic strategy means the loss of sovereignty and the loss of homeland . This also means a Man without ID... a Man without homeland ... without existence and dignity.

We pledge to Allah , homeland and we pledge to you that we will defend our homeland, out dignity and honour by all our strength... We will never surrender and we will never be brought to our knees .

We are confident that YOU , the free peoples and nations of the word and the Arab homeland will side with us... YOU will side with the right and will support the people of right until victory be achieved and enemies be defeated.
